KidScribe - Software Requirements Specification

Updated version. The status column now shows what is built.

Group ID	18
Student ID	230042129, 230042132, 230042157
Title	KidScribe
Brief Description	KidScribe is a tablet app that helps young children learn to write by hand using a stylus. Kids practice strokes, letters, words, and sentences. The app checks each letter and gives instant feedback. Parents can add words by taking photos of their child's own toys, and teachers can see which kids need extra help.

Summary

User stories	33 total - 33 Done, 0 not done
Functional requirements	24 (FR_1 to FR_24)
Unit tests	80 total - **58 Pass** (run automatically), 22 Not Run (to be done by hand on the emulator)

Notes

- All 33 user stories are built in the app. The code passes 'flutter analyze' with no issues and the Android APK builds.
- 58 of the 80 unit tests were run automatically with 'flutter test unit_testing/test'. 129 Dart test cases ran and all 129 passed, so those 58 are marked Pass.
- The other 22 tests need a real phone, so they are run by hand and are still 'Not Run'. Sign up and log in need Firebase's servers, reading handwriting needs Google's model on an Android device, reminders are sent by Android itself, toy words need the camera, and sync needs two devices.
- The test code, the full run output, and the steps for the 22 by-hand tests are in the 'unit_testing' folder of the project.
- US_28: the premium payment is a DEMO only. The app never asks for card details and no real money is taken. There is also a button to test a failed payment.
- US_27: sync needs internet and a Firebase project. Sync only adds and joins data, so nothing is lost. Because of that, a child or a task deleted on one tablet comes back after the next sync.
- FR_22, FR_23 and FR_24 (US_30 to US_33, tests T_69 to T_80) are new. They were added after the first SRS.

Rows with a yellow background are new in this version.

Serial	FR ID	Functional Requirement	User Story ID	US Title	As a (precise role)	I want (requirement)	So that (completion condition)	User Story	Acceptance Criteria	Priority	Status
1	FR_1	The system shall let parents and teachers create a new account.	US_1	Parent creates an account	Parent	to create a parent account with my details	I can start using the app for my child	As a Parent, I want to create a parent account with my details, so that I can start using the app for my child.	- Full name and email address can be entered. - A password and a confirm password can be entered. - The account role is set as Parent. - The account is created after all fields are filled correctly. - If any required field is empty, the account is not created and a message is shown. - If the email is already used, an error message is shown.	High	**Done**
2	FR_1	The system shall let parents and teachers create a new account.	US_2	Teacher creates an account	Teacher	to create a teacher account with my details	I can set up my class in the app	As a Teacher, I want to create a teacher account with my details, so that I can set up my class in the app.	- Full name, email, and school or institute name can be entered. - A password and a confirm password can be entered. - The account role is set as Teacher. - The account is created after all fields are filled correctly. - If the school or institute name is empty, the account is not created and a message is shown.	High	**Done**
3	FR_1	The system shall let parents and teachers create a new account.	US_3	Check password format during sign up	Parent	to know if my password format is correct while I create my account	I can set a strong and valid password	As a Parent, I want to know if my password format is correct while I create my account, so that I can set a strong and valid password.	- The password rules are shown on the sign up screen. - The app checks the password while the user types. - A password with 8 or more characters, one capital letter, and one number is accepted. - If the password is shorter than 8 characters, an error message is shown. - If the password has no capital letter or no number, an error message is shown. - If the confirm password does not match, the account is not created.	High	**Done**
4	FR_2	The system shall let parents and teachers log in to their account.	US_4	Parent logs in	Parent	to log in with my email and password	I can open my account safely	As a Parent, I want to log in with my email and password, so that I can open my account safely.	- Login screen asks for email and password. - Correct details log the parent in. - Parent stays logged in until they log out. - If the details are wrong, an error message is shown. - If the email or password field is empty, a message asks the parent to fill it.	High	**Done**
5	FR_2	The system shall let parents and teachers log in to their account.	US_5	Teacher logs in	Teacher	to log in with my email and password	I can see my class safely	As a Teacher, I want to log in with my email and password, so that I can see my class safely.	- Login screen asks for email and password. - Correct details open the teacher view. - Teacher can log out safely. - If the details are wrong, an error message is shown.	High	**Done**
6	FR_3	The system shall let parents and teachers create and manage child profiles.	US_6	Create a child profile	Parent	to create a profile for my child	the app can save each child's own progress	As a Parent, I want to create a profile for my child, so that the app can save each child's own progress.	- A new child profile can be added. - Child name and age can be entered. - More than one child can be added. - A profile can be edited or removed. - If the child name is empty, the profile is not saved and a message is shown.	High	**Done**
7	FR_4	The system shall let teachers create a class and add students.	US_7	Create class and add students	Teacher	to create a class and add my students	I can follow all my students in one place	As a Teacher, I want to create a class and add my students, so that I can follow all my students in one place.	- A class can be created. - Students can be added to the class. - Each student shows in the class list. - A student can be removed from the class. - If the class name is empty, the class is not created and a message is shown.	High	**Done**
8	FR_5	The system shall let children practice basic strokes with a stylus.	US_8	Practice basic strokes	Child	to practice basic strokes like lines, curves, and circles	I can get my hand ready before writing full letters	As a Child, I want to practice basic strokes like lines, curves, and circles, so that I can get my hand ready before writing full letters.	- Stroke practice screen can be opened. - Lines, curves, and circles can be traced. - The same stroke can be practiced again. - If nothing is drawn, a message asks the child to try the stroke.	High	**Done**
9	FR_6	The system shall let children practice writing letters from A to Z with a stylus.	US_9	Write letters A to Z	Child	to write letters from A to Z with a stylus	I can learn how each letter is formed	As a Child, I want to write letters from A to Z with a stylus, so that I can learn how each letter is formed.	- A letter can be selected from A to Z. - The letter shape is shown as a guide. - The written letter is saved. - If the letter is written wrong, feedback shows what to fix.	High	**Done**
10	FR_7	The system shall check each written letter and show instant feedback.	US_10	Get instant letter feedback	Child	to see if my letter is written correctly	I can fix my mistakes right away	As a Child, I want to see if my letter is written correctly, so that I can fix my mistakes right away.	- The app checks the letter after it is written. - A correct letter shows a success message. - Feedback appears right after writing. - A wrong letter shows what needs to be fixed.	High	**Done**
11	FR_8	The system shall let children practice writing common words.	US_11	Write common words	Child	to write common words with a stylus	I can move from single letters to full words	As a Child, I want to write common words with a stylus, so that I can move from single letters to full words.	- A list of common words is shown. - Each word can be written with a stylus. - Finished words are saved. - If a letter in the word is wrong, feedback is shown and the word is not marked correct.	High	**Done**

Serial	FR ID	Functional Requirement	User Story ID	US Title	As a (precise role)	I want (requirement)	So that (completion condition)	User Story	Acceptance Criteria	Priority	Status
12	FR_9	The system shall let children build sentences and learn basic grammar.	US_12	Build a sentence	Child	to drag word cards to make a sentence	I can learn grammar through play	As a Child, I want to drag word cards to make a sentence, so that I can learn grammar through play.	- Word cards are shown on the screen. - Cards can be dragged to build a sentence. - A correct sentence shows a success message. - If the word order or spacing is wrong, the sentence is not accepted and feedback is shown.	Medium	**Done**
13	FR_9	The system shall let children build sentences and learn basic grammar.	US_13	Learn punctuation and capital letters	Child	to use punctuation and capital letters	I can write proper sentences	As a Child, I want to use punctuation and capital letters, so that I can write proper sentences.	- Full stops and capital letters can be used. - The app shows where a capital letter is needed. - A correct sentence shows a success message. - If a capital letter or full stop is missing, the app shows what to fix.	Medium	**Done**
14	FR_10	The system shall guide children through five learning stages in order.	US_14	Move through the learning stages	Child	to move through the five learning stages step by step	I can learn writing from easy to hard	As a Child, I want to move through the five learning stages step by step, so that I can learn writing from easy to hard.	- Five learning stages are shown in order. - The next stage opens after the current one is done. - The child's current stage is shown. - A later stage stays locked until the stage before it is finished.	High	**Done**
15	FR_11	The system shall provide a Letter Match game.	US_15	Play Letter Match	Child	to match the same letters in a game	I can get better at knowing letters	As a Child, I want to match the same letters in a game, so that I can get better at knowing letters.	- Letter Match game can be started. - Same letters can be matched together. - The game gets harder as the child plays. - If two different letters are matched, no score is given and the child tries again.	Medium	**Done**
16	FR_12	The system shall provide a Letter Ninja timed game.	US_16	Play Letter Ninja	Child	to write letters fast in a timed game	I can write more quickly and correctly	As a Child, I want to write letters fast in a timed game, so that I can write more quickly and correctly.	- Letter Ninja game can be started. - A timer runs during the game. - The app checks each written letter. - If the time runs out, the round ends and no reward is given.	Medium	**Done**
17	FR_13	The system shall provide a Free Writing activity on a blank screen.	US_17	Free write on a blank screen	Child	to write letters freely on a blank screen	I can practice writing in my own way	As a Child, I want to write letters freely on a blank screen, so that I can practice writing in my own way.	- A blank writing screen can be opened. - Letters can be written freely with a stylus. - Badges are given for good writing. - If a letter is written wrong, it is marked wrong and feedback is shown.	Medium	**Done**
18	FR_14	The system shall give badges, streaks, and rewards to children.	US_18	Earn badges and rewards	Child	to earn badges and rewards for my work	I feel happy and want to keep practicing	As a Child, I want to earn badges and rewards for my work, so that I feel happy and want to keep practicing.	- Badges are given for finished tasks. - A daily streak is counted for practice. - Earned badges are shown on a screen. - If a day of practice is missed, the streak count goes back to zero.	Medium	**Done**
19	FR_15	The system shall send daily practice reminders.	US_19	Get a daily practice reminder	Parent	to get a daily reminder for my child to practice	my child keeps a daily practice habit	As a Parent, I want to get a daily reminder for my child to practice, so that my child keeps a daily practice habit.	- A daily reminder can be turned on. - The reminder time can be set. - The app sends a reminder at that time. - If the reminder is turned off, no reminder is sent.	Low	**Done**
20	FR_16	The system shall let parents add custom words using the toy camera.	US_20	Add word from a toy photo	Parent	to take a photo of my child's toy and add it as a word	my child can practice words they care about	As a Parent, I want to take a photo of my child's toy and add it as a word, so that my child can practice words they care about.	- Camera can be opened inside the app. - A photo of a toy can be taken. - The toy word is added to the word list. - The new word shows up in games and practice. - If the photo is not clear, the word is not added and the app asks to take the photo again.	Medium	**Done**
21	FR_17	The system shall let parents set writing challenges for their child.	US_21	Set a writing challenge	Parent	to set a small writing mission for my child	my child stays motivated to practice	As a Parent, I want to set a small writing mission for my child, so that my child stays motivated to practice.	- A challenge can be created by the parent. - A goal can be set, like write 5 words with letter A. - The child can see the challenge in the app. - The challenge is marked done when finished. - If no goal is set, the challenge is not created and a message is shown.	Medium	**Done**
22	FR_18	The system shall give teachers a class view of student progress.	US_22	See struggling students	Teacher	to see which students need extra help	I can give help to the right kids	As a Teacher, I want to see which students need extra help, so that I can give help to the right kids.	- A class list is shown to the teacher. - Each student's progress is shown. - Students who are behind are marked. - The list updates as students practice. - If a student has no activity, they are shown as 'not started'.	High	**Done**
23	FR_18	The system shall give teachers a class view of student progress.	US_23	Assign custom challenges	Teacher	to assign custom challenges to the class	I can give the right practice to students	As a Teacher, I want to assign custom challenges to the class, so that I can give the right practice to students.	- A challenge can be created by the teacher. - A goal can be set for the challenge. - The challenge is sent to the students. - Finished challenges are shown to the teacher. - If no goal is set, the challenge is not sent and a message is shown.	Medium	**Done**

Serial	FR ID	Functional Requirement	User Story ID	US Title	As a (precise role)	I want (requirement)	So that (completion condition)	User Story	Acceptance Criteria	Priority	Status
24	FR_18	The system shall give teachers a class view of student progress.	US_24	Export progress reports	Teacher	to export a student's progress report	I can use it in parent meetings	As a Teacher, I want to export a student's progress report, so that I can use it in parent meetings.	- A report can be created for each student. - The report can be exported from the app. - The report shows the progress details. - If the student has no activity, the report shows 'no activity yet'.	Low	**Done**
25	FR_19	The system shall track each child's progress and show reports to parents.	US_25	View child's progress	Parent	to see my child's progress report	I know how my child is doing	As a Parent, I want to see my child's progress report, so that I know how my child is doing.	- A progress screen can be opened. - Weekly progress is shown. - Finished letters and words are listed. - Weak areas are shown clearly. - If the child has not practiced yet, the screen shows 'no progress yet'.	High	**Done**
26	FR_20	The system shall save data on the device and sync it across devices.	US_26	Practice offline	Child	to practice even without internet	I can keep learning anywhere	As a Child, I want to practice even without internet, so that I can keep learning anywhere.	- Practice can be done without internet. - Written work is saved on the device. - Saved work is not lost when the app closes. - If there is no internet, practice still works and data is kept on the device.	Medium	**Done**
27	FR_20	The system shall save data on the device and sync it across devices.	US_27	Sync progress across devices	Parent	to sync my child's progress on different devices	I can check the progress on any device	As a Parent, I want to sync my child's progress on different devices, so that I can check the progress on any device.	- Progress can be synced by the parent. - The same progress shows on all devices. - Synced data stays up to date. - If there is no internet, sync waits and a message is shown.	Low	**Done**
28	FR_21	The system shall provide premium features through a paid parent plan.	US_28	Unlock premium features	Parent	to buy the premium plan in the app	I can use the extra premium features	As a Parent, I want to buy the premium plan in the app, so that I can use the extra premium features.	- The premium plan can be viewed in the app. - The premium plan can be bought. - Premium features open after payment. - Payment status is shown to the parent. - If the payment fails, premium stays locked and a message is shown.	Low	**Done (demo payment)**
29	FR_21	The system shall provide premium features through a paid parent plan.	US_29	Use advanced reports and custom challenges	Parent	to use advanced reports and custom challenges	I can support my child's learning more deeply	As a Parent, I want to use advanced reports and custom challenges, so that I can support my child's learning more deeply.	- Advanced reports can be opened with premium. - Custom challenges can be made with premium. - Detailed progress charts are shown. - If the account is not premium, the feature is locked and an upgrade message is shown.	Low	**Done**
30	FR_22	The system shall let teachers and parents write feedback on a child's work.	US_30	Write feedback on a child's work	Teacher	to write feedback on my student's work	the child knows what to practice next	As a Teacher, I want to write feedback on my student's work, so that the child knows what to practice next.	- A feedback box can be opened for a child. - Feedback can be written for the whole profile or for one finished letter. - Saved feedback is shown to the child. - Feedback can be removed. - If the feedback box is empty, nothing is saved and a message is shown.	Medium	**Done**
31	FR_23	The system shall let a time limit be set on an assigned task.	US_31	Set a time limit on a task	Teacher	to set a deadline on the task I give	my students finish their work on time	As a Teacher, I want to set a deadline on the task I give, so that my students finish their work on time.	- A deadline can be set when the task is made. - The time left is shown to the student. - When the time is over, the task is closed and sent by itself. - The teacher can give more time later. - If no deadline is set, the task stays open.	Medium	**Done**
32	FR_23	The system shall let a time limit be set on an assigned task.	US_32	Set a time limit on a challenge	Parent	to set a time limit on my child's writing challenge	my child practices regularly	As a Parent, I want to set a time limit on my child's writing challenge, so that my child practices regularly.	- A time limit can be set when the challenge is made. - The time left is shown to the child. - When the time is over, the challenge is closed. - The parent can give more time later. - If no time limit is set, the challenge stays open.	Medium	**Done**
33	FR_24	The system shall provide a timed test where no help is shown.	US_33	Take a timed test	Child	to take a test with no help on the screen	my teacher can see what I can write on my own	As a Child, I want to take a test with no help on the screen, so that my teacher can see what I can write on my own.	- A test can be started from the task list. - The video, the guide and the numbered points are hidden during the test. - The timer starts when the child opens the test. - When the time is over, the test is locked and sent by itself. - The mark and the answer key are shown after the teacher gives the mark.	Medium	**Done**

Test ID	US ID	Test Case Title	Test Steps / Input	Expected Result	Type	How it was run	Status
T_1	US_1	Valid parent sign up	Name 'Rahim', email 'rahim@mail.com', valid password, role Parent	Account is created and the home screen opens	Positive	By hand on the emulator	Not Run
T_2	US_1	Empty required field	Name left empty, other fields filled	Account is not created and a 'please fill all fields' message is shown	Negative	By hand on the emulator	Not Run
T_3	US_1	Duplicate email	Email 'rahim@mail.com' that is already registered	Account is not created and an 'email already used' message is shown	Negative	By hand on the emulator	Not Run
T_4	US_2	Valid teacher sign up	Name, email, school name, valid password, role Teacher	Account is created and the teacher view opens	Positive	By hand on the emulator	Not Run
T_5	US_2	Missing school name	School or institute name left empty	Account is not created and an error message is shown	Negative	By hand on the emulator	Not Run
T_6	US_3	Password rules are visible	Open the password field on the sign up screen	The password rules text is shown on screen	Positive	By hand on the emulator	Not Run
T_7	US_3	Valid password accepted	Password 'Kidscribe1'	Password is accepted and no error is shown	Positive	Automatic (flutter test)	**Pass**
T_8	US_3	Password too short	Password 'Kid1'	Password is rejected and an 'at least 8 characters' message is shown	Negative	Automatic (flutter test)	**Pass**
T_9	US_3	No capital letter	Password 'kidscribe1'	Password is rejected and a 'need one capital letter' message is shown	Negative	Automatic (flutter test)	**Pass**
T_10	US_3	No number	Password 'Kidscribe'	Password is rejected and a 'need one number' message is shown	Negative	Automatic (flutter test)	**Pass**
T_11	US_3	Confirm does not match	Password 'Kidscribe1', confirm 'Kidscribe2'	Account is not created and a 'passwords do not match' message is shown	Negative	Automatic (flutter test)	**Pass**
T_12	US_4	Valid parent login	Correct email and password	Parent is logged in and the home screen opens	Positive	By hand on the emulator	Not Run
T_13	US_4	Wrong password	Correct email, wrong password	Parent is not logged in and an error message is shown	Negative	By hand on the emulator	Not Run
T_14	US_4	Empty field	Email left empty	A message asks the parent to enter the email	Negative	By hand on the emulator	Not Run
T_15	US_5	Valid teacher login	Correct email and password	Teacher view opens	Positive	By hand on the emulator	Not Run
T_16	US_5	Wrong details	Wrong password	Teacher is not logged in and an error message is shown	Negative	By hand on the emulator	Not Run
T_17	US_6	Add a child profile	Name 'Sara', age 5	Profile is saved and shown in the profile list	Positive	Automatic (flutter test)	**Pass**
T_18	US_6	Empty name	Name left empty	Profile is not saved and a message is shown	Negative	Automatic (flutter test)	**Pass**
T_19	US_6	Remove a profile	Remove the 'Sara' profile	Profile is removed from the list	Positive	Automatic (flutter test)	**Pass**
T_20	US_7	Create class and add student	Class 'Class A', add student 'Sara'	Student shows in the class list	Positive	Automatic (flutter test)	**Pass**
T_21	US_7	Remove a student	Remove 'Sara' from the class	Student is removed from the list	Positive	Automatic (flutter test)	**Pass**
T_22	US_7	Empty class name	Class name left empty	Class is not created and a message is shown	Negative	Automatic (flutter test)	**Pass**
T_23	US_8	Trace a stroke	Draw a straight line on the stroke screen	Stroke is accepted and can be practiced again	Positive	Automatic (flutter test)	**Pass**
T_24	US_8	No drawing	Leave the stroke screen without drawing	A message asks the child to draw the stroke	Negative	Automatic (flutter test)	**Pass**
T_25	US_9	Write a letter	Select 'A' and write it on the guide	Letter is saved and marked correct	Positive	Automatic (flutter test)	**Pass**
T_26	US_9	Wrong letter shape	Write a messy 'A' far from the guide	Feedback shows what to fix	Negative	Automatic (flutter test)	**Pass**
T_27	US_10	Correct letter feedback	Write a clear 'B'	A success message is shown	Positive	Automatic (flutter test)	**Pass**
T_28	US_10	Wrong letter feedback	Write an unclear 'B'	Feedback shows what needs to be fixed	Negative	Automatic (flutter test)	**Pass**
T_29	US_11	Write a word	Write 'cat' correctly	Word is checked, marked correct, and saved	Positive	By hand on the emulator	Not Run
T_30	US_11	Wrong letters in word	Write 'cot' when the target is 'cat'	Word is not marked correct and feedback is shown	Negative	By hand on the emulator	Not Run
T_31	US_12	Build a correct sentence	Drag cards to make 'The cat is big'	A success message is shown	Positive	Automatic (flutter test)	**Pass**
T_32	US_12	Wrong word order	Drag cards to make 'big cat The is'	Sentence is not accepted and feedback is shown	Negative	Automatic (flutter test)	**Pass**
T_33	US_13	Correct punctuation	Write 'The cat is big.' with a capital and a full stop	A success message is shown	Positive	Automatic (flutter test)	**Pass**
T_34	US_13	Missing capital letter	Write 'the cat is big.'	The app shows that a capital letter is needed	Negative	Automatic (flutter test)	**Pass**
T_35	US_14	Unlock next stage	Finish Stage 1	Stage 2 opens	Positive	Automatic (flutter test)	**Pass**
T_36	US_14	Locked stage	Try to open Stage 3 before Stage 2 is done	Stage 3 stays locked	Negative	Automatic (flutter test)	**Pass**
T_37	US_15	Correct match	Match 'A' with 'A'	The score goes up	Positive	Automatic (flutter test)	**Pass**
T_38	US_15	Wrong match	Match 'A' with 'B'	No score is given and the child can try again	Negative	Automatic (flutter test)	**Pass**
T_39	US_16	Fast correct writing	Write the letter correctly before the timer ends	A reward is given	Positive	By hand on the emulator	Not Run
T_40	US_16	Time runs out	Do not finish the letter before the timer ends	The round ends and no reward is given	Negative	By hand on the emulator	Not Run
T_41	US_17	Free write correctly	Write clear letters on the blank screen	Letters are checked and a badge is given	Positive	By hand on the emulator	Not Run
T_42	US_17	Wrong letter	Write an unclear letter	The letter is marked wrong and feedback is shown	Negative	By hand on the emulator	Not Run
T_43	US_18	Earn a badge	Finish a practice task	A badge is given and shown	Positive	Automatic (flutter test)	**Pass**
T_44	US_18	Streak reset	Miss one day of practice	The streak count goes back to zero	Negative	Automatic (flutter test)	**Pass**
T_45	US_19	Reminder is sent	Turn on the reminder and set it to 6 PM	A reminder is sent at 6 PM	Positive	By hand on the emulator	Not Run
T_46	US_19	Reminder turned off	Turn off the reminder	No reminder is sent	Negative	By hand on the emulator	Not Run
T_47	US_20	Add a toy word	Take a clear photo of a toy dinosaur	The word 'dinosaur' is added and shows in games	Positive	By hand on the emulator	Not Run
T_48	US_20	Unclear photo	Take a blurry photo	No word is added and the app asks to retake the photo	Negative	Automatic (flutter test)	**Pass**
T_49	US_21	Create a challenge	Set goal 'write 5 words with letter A'	The child can see the challenge	Positive	Automatic (flutter test)	**Pass**
T_50	US_21	Complete a challenge	Child finishes the 5 words	The challenge is marked done	Positive	Automatic (flutter test)	**Pass**
T_51	US_21	Empty goal	Try to create a challenge with no goal	The challenge is not created and a message is shown	Negative	Automatic (flutter test)	**Pass**
T_52	US_22	Struggling student marked	A student who is behind on practice	The student is marked in the class list	Positive	Automatic (flutter test)	**Pass**
T_53	US_22	List updates	A marked student does more practice	The student's progress updates in the list	Positive	Automatic (flutter test)	**Pass**
T_54	US_22	No activity	A student who has not started	The student is shown as 'not started'	Negative	Automatic (flutter test)	**Pass**
T_55	US_23	Assign a challenge	Create a class challenge with a goal	The challenge is sent to the students	Positive	Automatic (flutter test)	**Pass**
T_56	US_23	Empty goal	Try to assign a challenge with no goal	The challenge is not sent and a message is shown	Negative	Automatic (flutter test)	**Pass**
T_57	US_24	Export a report	Export the report for an active student	A report file with progress details is created	Positive	Automatic (flutter test)	**Pass**
T_58	US_24	No activity report	Export the report for a student with no activity	The report shows 'no activity yet'	Negative	Automatic (flutter test)	**Pass**
T_59	US_25	View progress	Open the progress screen for an active child	Weekly progress and weak areas are shown	Positive	Automatic (flutter test)	**Pass**
T_60	US_25	No progress yet	Open the progress screen for a new child	The screen shows 'no progress yet'	Negative	Automatic (flutter test)	**Pass**
T_61	US_26	Practice with no internet	Turn off internet and write letters	Work is saved on the device	Positive	Automatic (flutter test)	**Pass**
T_62	US_26	Reopen the app	Close and open the app again	The saved work is still there	Positive	Automatic (flutter test)	**Pass**
T_63	US_27	Sync across devices	Sync on the tablet, then open the app on the phone	The same progress shows on the phone	Positive	By hand on the emulator	Not Run
T_64	US_27	Sync with no internet	Try to sync with no internet	Sync waits and a message is shown	Negative	By hand on the emulator	Not Run
